

Information on your Storks.com Stork Sign
(Models 123456, 123457, 123458, 123459)

Unboxing your Stork Sign

We suggest opening your box carefully to avoid damaging the sign. Do Not penetrate the packaging with a razor knife.

Upon opening your package, you will see the Stork Body and Legs, A double sided Adhesive Pad (for the Stork's Legs), Metal H-Stake (for Lawn Mounting), Two double sided Adhesive Pads (for displaying on Doors, Windows, etc), and an Adhesive Hook Mount (for Walls, etc)

Assembling your Stork Sign

Our Storks come in two pieces. (Body & Legs)

1) Place the contents lying Face Down on a flat surface.

2) Attach the Legs to the Body using an Adhesive Pad. **IMPORTANT:** If you are placing the Stork on a Lawn, you should place the Lawn Stake into the Stork **FIRST** to assure proper positioning of Legs. Then place the Legs behind the body five Inches (5") above the bottom of the body so that the foot will sit on the Lawn Stake bottom horizontal bar (see diagram)

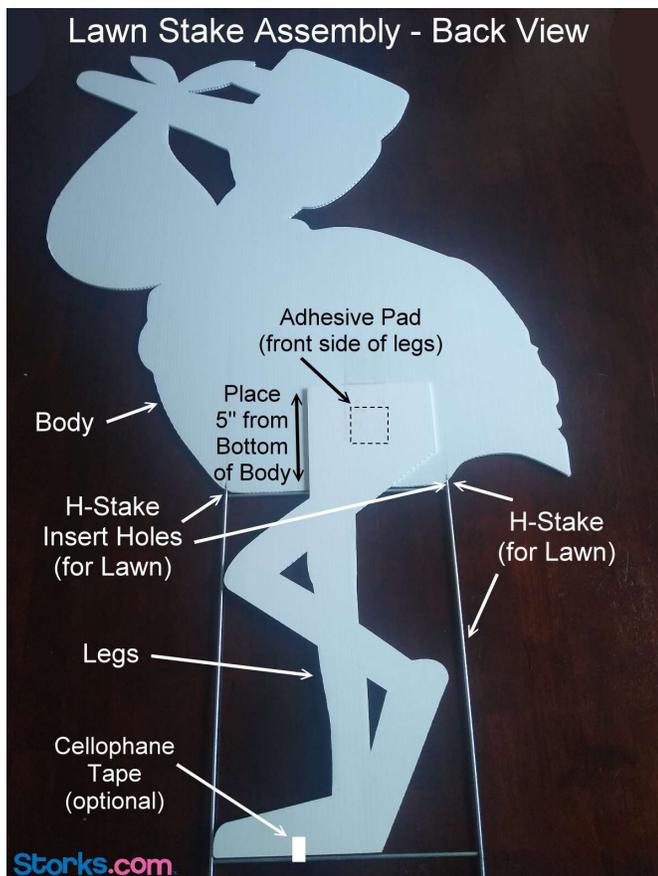

That is it. Now... How are you mounting it?

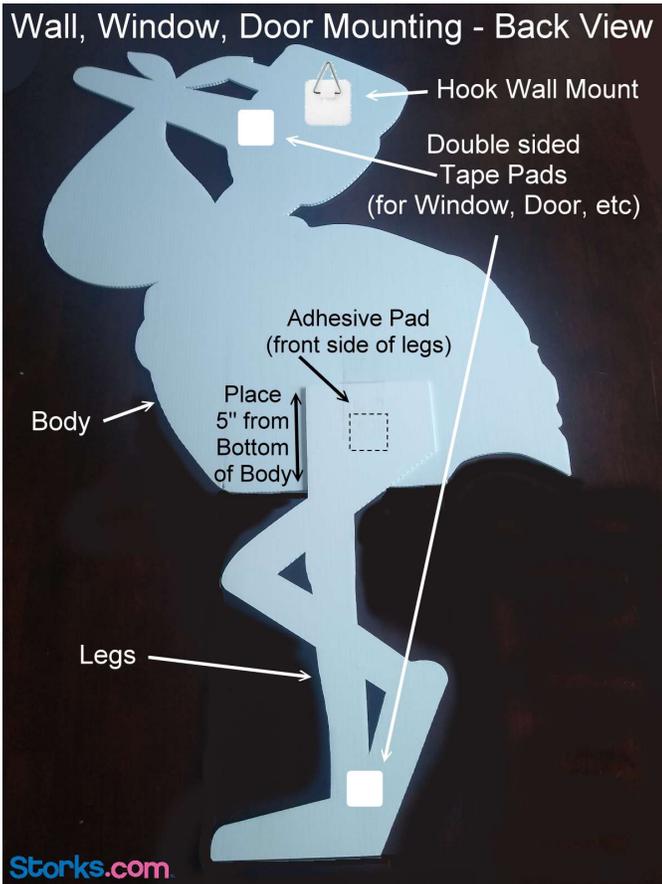

Lawn Mount

1) Slide the H-Stake rods into the Bottom of Stork Body using two of the many fluted holes. Make sure the top H-Stake prongs are perfectly parallel with each other when inserting into the stork body otherwise it will be difficult to push into the body. Also, the Stake must be centered so the Legs fit inside the bottom of the "H".

2) Push opposite side of the H-Stake rods into the ground.

Optional: Tape the Feet to the Stake bottom horizontal bar for added support using a small cellophane tape strip.

Get the most out of your Stork

If you are displaying the Stork on a lawn, we suggest you enjoy the Stork indoors when you are finished displaying it outside. To do so, simply remove the lawn stake from the body and hang on baby's wall inside with the supplied adhesive Wall Hook.

Wall and/or Door Mount

Place the Two Double sided Adhesive Pads on the back of Stork as shown in diagram and press in place.

Or...

Place Hook Wall Mount Pad on the back of Stork as shown in diagram and hang loop on a nail.

Window/Glass Mount

Place the Two Double sided Adhesive Pads on the Front of Stork (on the White surfaces only) and press in place inside of window.

Ribbon/Bow Option

Peel and stick the Ribbon/Bow at the crossing of the Beak and Sack Bundle. Exact location of placement can be at your discretion. Add a piece of clear cellophane tape over the ribbon/bow stick pad for more security if needed. Ribbon/Bow purchase Optional.

Personalization Options

Professional:
We offer the ability to order your Stork fully personalized from us with Baby's Birth Information on the Front of the Stork's Body. We use an attractive, high-quality, highly visible, permanent vinyl. We personalize our Storks in-house so this option will not slow up your order and delivery time.

Do It Yourself:
You can personalize it yourself by writing on the front blank surface of the Stork. The personalizing area is approximately 9" wide x 9" high.

We suggest taking a digital photo of the Stork Sign all setup and email and/or text it to mother.
